

ADDITIONS.

- Voici quatre façons différentes de résoudre le même calcul.
- A toi d'imiter

A toi, résous des quatre façons : 45 + 39 et 38 + 53	
$47 + 26 = (47 + 20) + 6 = 67 + 6 = 73$	$45 + 39 = (\dots + \dots) + \dots = \dots + \dots = 84$ $38 + 53 = (\dots + \dots) + \dots = \dots + \dots = 91$
$47 + 26 = (40 + 20) + (7 + 6) = 60 + 13 = 73$	$45 + 39 = (\dots + \dots) + (\dots + \dots) = \dots + \dots = 84$ $38 + 53 = (\dots + \dots) + (\dots + \dots) = \dots + \dots = 91$
$47 + 26 = (40 + 26) + 7 = 66 + 7 = 73$	$45 + 39 = (\dots + \dots) + \dots = \dots + \dots = 84$ $38 + 53 = (\dots + \dots) + \dots = \dots + \dots = 91$
$47 + 26 = (47 + 3) + 23 = 50 + 23 = 73$	$45 + 39 = (\dots + \dots) + \dots = \dots + \dots = 84$ $38 + 53 = (\dots + \dots) + \dots = \dots + \dots = 91$
